Network Logical Map

Attached is the logical map of the network as of December 30, 1972. The ovals indicate the host computers that we think are connected to each IMP, with the double oval implying an interface. If there are any errors in the map or if your status vis-a-vis connected hosts, is going to change within the next few months, please contact:

Nancy J. Neigus

Bolt Beranek and Newman Inc.
50 Moulton Street

Cambridge, Ma. 02138

617-491-1850 X511

or leave a message for NJN at the NIC. In the future we would appreciate being notified any time there is such a change.

NJN/jm

Attach.

Attached is a figure of the ARPA NETWORK, LOGICAL MAP, JANUARY 1973
